

ALL ABOUT PLA

PLA stands for polylactic acid. It is a plant-based compostable bioplastic. Vegware uses PLA for clear cold cups and deli containers, as well as clear windows and cup linings. It's practical and sustainable, and makes your food and drink look great.

BENEFITS OF PLA

- Made from renewable plant materials
- Light, strong, clear and food-safe
- Lower carbon emissions in manufacture than oil-based plastics

COLD CUPS

81% less carbon than polystyrene

DELI CONTAINERS

77% less carbon than PET

HOT CUP LINING

72% less carbon than PE plastic

Like all Vegware products, PLA is commercially compostable where facilities exist. Talk to our environmental team about the best way to recycle your used Vegware and food waste.
