Something to think about...

What is the one scientific breakthrough that would provide the biggest benefit to humanity? The biggest threat?
Cells in the human body are regularly replaced, for example, skin cells only exist for about two weeks. Does this mean you don't have the same body throughout your life?

Something to think about...during the summer months there are normally many festivals which take place in the UK. At the end of the event, there are thousands of tents and camping equipment abandoned by festivalgoers. Consider advising the festival organisers how to deal with the aftermath of the event, think about what support they would they require?
