Solutions

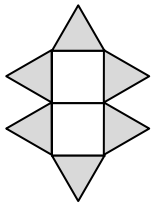
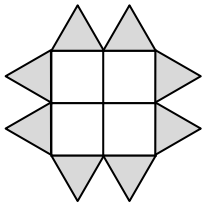
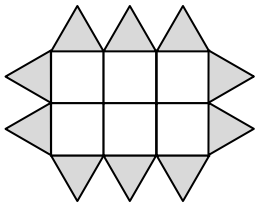
73 Here is a sequence of patterns made from square tiles ☐ and triangular tiles. △



pattern number 1



pattern number 2



pattern number 3

(a) Find an expression, in terms of n, for the number of triangular tiles in pattern n.

.....

(2)

Rich makes one of the patterns from the sequence.
He uses 88 total tiles.

(b) Work out how many **square** tiles Rich used.

..... square tiles

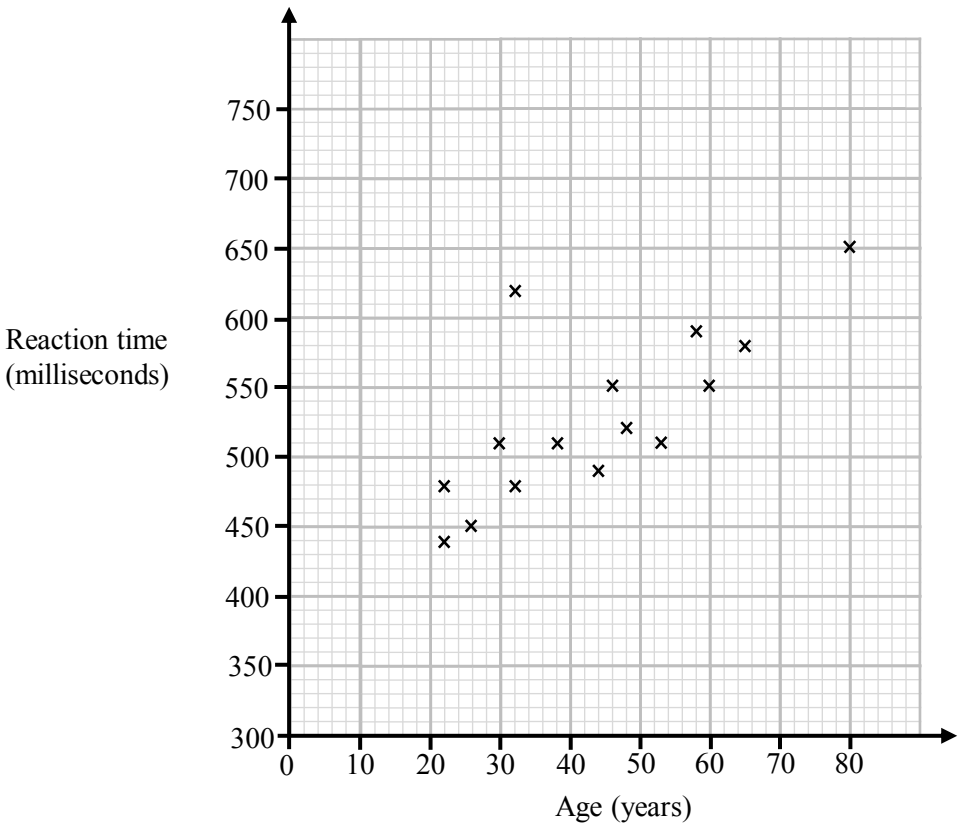
76 The scatter graph shows reaction times in milliseconds and the ages of 15 people.



(a) One of the points plotted on the scatter graph is considered an outlier.
Write down the coordinates of this point.

(..... , ...)

(1)

(b) For all the other points write down the type of correlation.

.....

(1)

A person aged 55 has their reaction time measured.

(c) Use the graph to estimate their reaction time.

..... milliseconds

82 Harry practices his penalty kick on three different days and records how many he scores and misses.

The table below shows how many times he scored and missed on each day.

	Monday	**Tuesday**	**Wednesday**
Score	19	35	27
Miss	11	25	18

Harry's coach wants to estimate the probability that he will score a penalty.

(a) Which day's results will give the best estimate for the probability that Harry will score a penalty? Give a reason for your answer.

.....

.....

(1)

Ella knows that the probability that she will score a penalty is 0.7
During one week Ella takes 200 penalties.

(b) Work out an estimate for the number of penalties that Ella scored.

.....
